Nota: Valores negativos equivalen a lugares disponibles en el Sistema Nacional Penitenciario.

- El % se obtiene en relación de la población total de cada centro de internamiento.
- Estos centros no reportan población debido a que los internos no permanecen más de 72 horas en los mismos, debido a que son trasladados a centros más grandes dentro de la misma entidad.
- En el estado de Chihuahua en el cereso de esa misma localidad se adaptó el área que ocupaba la antigua Penitenciaria del estado para alojar a una parte de los sentenciados que estan recluídos en el mismo, esto es con la finalidad de evitar la sobrepoblación y el hacinamiento en el centro penitenciario.
- En el estado de B.C. se modificó la capacidad de internamiento en el cereso de Mexicali, en virtud de que se ampliaron 35 espacios más, por lo que pasa de 1,492 a 1,527 espacios.
- En el estado de Puebla los centros penítenciarios de Cd. Serdán y Tepexi de Rodríguez fueron cerrados temporalmente, por los daños que sufrieron con motivo del sismo acontecido en junio del año próximo pasado.
- Debido a que la distribución de internos por fuero y situación jurídica de la población recluída en el Ceferepsi no coincide con la base de datos que obra en poder de esta Dirección de Informática, actualmente, personal del centro verifica en su totalidad la información de su población.
